Exhausted Adults

SO
NOTHING
WAS RE-
SOLVED,
IN THE
END.

AND DR.
IDEYA
WENT
RIGHT
BACK TO
HIS DESK.

AFTER ALL
THAT,
OZAWA'S
MOTHER
LEFT.

NO....

WAS THAT
POINT-
LESS,
WHAT I
DID?

I'LL TRY
TALKING TO
MR. HIGASHI
AGAIN. AND
MR.
OZAWA
AGAIN.

AND I'LL
KEEP AT IT,
TOO, UNTIL
MR.
OZAWA
COMES
AROUND.

WHY GO
THAT FAR?

BESIDES,
WHAT'S IN
IT FOR
YOU?

YOU'LL
NEVER GET
ANYONE'S
APPROVAL
DOING IT
YOUR WAY.

IS MR.
OZAWA'S
LIFE.

THE ONLY
THING THAT
MATTERS
TO ME

IT'S SAID
THAT SO
MANY CHILD
OATHN LOST
THEIR
LIVES.

BUT MR.
OZAWA'S
ARTICLE IS
NOWHERE
TO BE
FOUND.

THERE ARE
ARTICLES
ABOUT THE
MADAMAMA
INCIDENT BY
SAYWHERE
YOU LOOK.

BUT MR.
OZAWA'S
LIFE...

COMPARED
TO THOSE
CHILDREN'S
LIVES, DOES
IT MEAN
NOTHING AT
ALL?

THAT'S
ALL I CAN
DO FOR
HIM RIGHT
NOW...

AND AS A
DOCTOR,
THAT'S MY
ONE AND
ONLY
JOB...

I INTEND
TO MAKE
A PLACE
FOR MR.
OZAWA TO
LIVE.

I WANT TO
KEEP ON
BEING A
DOCTOR.

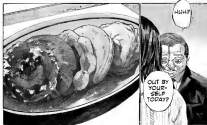

L...

I LIKE
BEING A
DOCTOR.

LET ME
GUESS—

ARE YOU
DATING
DR.
SAITO?

HE'S UP
TO SOME-
THING
AGAIN,
ISN'T HE.

HE WAS
FINE.

HE MIGHT
BE GETTING
HIMSELF
THROWN OUT
OF PERCH
TOMORROW,
THOUGH.

SURE. SOME-
TIMES HE ACTS
LIKE HE'S RE-
FLECTED ON
WHAT HE'S
DONE WRONG.

"IS WHAT I
DID JUST
PLAIN SEEM-
SATISFAC-
TION?" STUFF
LIKE THAT.

HON-
ESTLY
BY...

IT'S LIKE HE'S
ABOVE RULES,
ABOVE NOON-
VENIENCING
THOSE
AROUND HIM.

IT MUST
BE
ROUGH.

DATING
SOMEONE
LIKE HIM.

BUT I...

I'VE NEVER
MET SOME-
ONE SO
EAGERST.

OH, I'VE
THOUGH
T ABOUT
CALLING
IT OFF.

SO I
THOUGHT
I COULD
PROVIDE
AFFIRMA-
TION.

I'D BE
THERE WITH
THE AFFIR-
MATION HE
NEEDS.

IF SOME-
ONE WERE
TO SHUT
HIM DOWN.

WE SURE
TOOK A BIG
DETOUR
THERE,
RIGHT WE?

GO
ANYWAY,
WHAT'S DR
GATO UP
TO THIS
TIME?

OH,
GOD...
LISTEN
TO ME...

WHY AM I
TALKING
ABOUT
THIS
STUFF?

A psychiatric patient attempted suicide by jumping off the roof of a university hospital

The words that began this article were spoken by the patient's doctor, an intern, after the patient jumped

What was it that drove him to suicide?

There is a darkness within the media never mentioned

Kenji graduated college this year. He was a serious student who always sat in the front row of his classes, but the flurry of job fairs came and went with no success. Having no friends with whom to discuss his uncertainty about his future, his college life was a solitary one. While in college, Kenji's illness had yet to manifest itself.

Once Kenji graduated, he had no full-time career, and instead made a living with a part-time job. It was around this time that he began experiencing insomnia and persistent headaches. One day, Kenji was accused of shoplifting from the convenience store at which he worked. "I was too exhausted to even defend myself," Kenji said. This incident set off something inside him. He began hearing things and behaving strangely. Following up on a report, the police came to Kenji's apartment to take him into custody, only to find him stabbing the wall with a kitchen knife over and over. The name of Kenji's disease is integration disorder. Formerly known as schizophrenia, the illness makes a person lose his or her sense of self. He was admitted to a university hospital in Tokyo, where he would live until the day before he attempted suicide.

Though Kenji remained tormented by hallucinations while on the psychiatric ward, time and treatment had the desired effect, and his symptoms began to improve. It was then that Kenji met another patient admitted for integration disorder. Yukari lost her real name.

Kenji soon developed romantic feelings for Yukari. After determining that Kenji had recovered enough to be returned to the world at large, his doctor okayed Kenji's release. Kenji was determined to go through with the move, despite his uneasiness. At last he could have the life with Yukari he'd been dreaming of. But a mere week before he was due to be discharged, something happened.

The eyes of the nation were on the stabbing incident at Marumaru Elementary. It was a singular event—and a brutal one. The first reports were devastating. Yet one phrase from the police report was picked up, emphasized, and repeated by media outlets everywhere:

"The man has been in and out of psychiatric hospitals."

Indeed, the suspect they'd apprehended did have a history of institutionalization. But without ever discussing whether mental illness had played any role in bringing about this tragedy, public opinion jumped straight to its conclusion: The mentally disabled are dangerous. In the midst of all this, Kenji's discharge went as planned.

In only one day, he went from being a man prepared to leave the hospital for good to being driven to leap from its roof. It's unclear what happened in what little time he had outside the hospital walls. It would be easy to say his illness made him do it. Yet Kenji's case is fraught with so much more: prejudice against mental illness, the evils of media, and the problems of psychiatric care. This seven-part series will examine this sad state of affairs from many different angles.

Now

Burn
brighter,
hotter.

May the
flames
be seen

and miles
around.*

Integration disorder affects about one in every hundred people the world over, regardless of country, race, or ethnicity

The cause may lie in a faulty transmission within the brain, but no one really knows for sure

Suppose that an invisible membrane separates "me" from everything that is "not-me"

We know that our hand is a part of us while the television standing before us is not

Integration disorder pokes holes in that membrane

When "me" looks out through those holes, you start to feel yourself in everything around you

Soon everything "not-me" is forcing its way to your side of the tattered membrane.

You have barely
enough time
to string your
thoughts
together before
they spill out of
the "me".

Are the
mentally
disabled
dangerous?

That amounts
to no more
than 0-67
percent of
those arrested.

According to police
statistics, of the
approximately 330
thousand people
arrested for general
penal code offenses
in 2000

just over two
thousand had
—or were
suspected of
having—
mental illnesses

and is even less
than the 1-84
percent of those
aged 15 and
up who are
mentally ill

Further
more,

Although the numbers
are comparatively
higher for serious
crimes, such as murder
(9 percent) and rape
(16 percent),

we must take into
consideration the
likelihood that the
majority of these
suspects still at
large are not
mentally ill

these include cases
of temporary insanity
as well as times
when a mental
illness was first
diagnosed after
the crime.

No more than
2,072 of them, or
0.1 percent, have
been arrested for
general offenses.

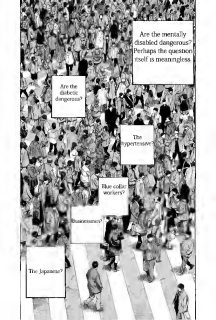

Japan is home to
some two million
mentally disabled
individuals.

According to the
Ministry of Justice,
in 70 percent of the
murders committed
by the mentally ill
the victims were
related to the killer.

No more than 130
of them, or 0.01
percent, have com-
mitted murder or
attempted murder.

They are rarely repeat
offenders, and the idea
that a mentally ill
person let out into the
world will become a
random street slasher
is a false one.

Are the mentally
disabled dangerous?
Perhaps the question
itself is meaningless.

Are the
diabetic
dangerous?

The
hypertensive?

Blue collar
workers?

Overweight?

The Japanese?
